Workers suffering from work-related stress, depression or anxiety (new or long-standing) in 2023/24

**300,000**

Workers suffering from a new case of work-related stress, depression or anxiety in 2023/24

**16.4 million**

Working days lost due to work-related stress, depression or anxiety in 2023/24

# 2025

 **1.0 million**

Workers suffering from work-related stress, depression or anxiety (new or long-standing) in 2024/25

*Source: Estimates based on self-reports from the Labour Force Survey for people who worked in the last 12 months*

**964,000**

Workers suffering from work-related stress, depression or anxiety (new or long-standing) in 2024/25

**409,000**

Workers suffering from a new case of work-related stress, depression or anxiety in 2024/25

**22.1 million**

Working days lost due to work-related stress, depression or anxiety in 2024/25

## 2024

**0.5 million**

Workers suffering from work-related musculoskeletal disorders (new or long-standing) in 2023/24

*Source: Estimates based on self-reports from the Labour Force Survey for people who worked in the last 12 months*

**543,000**

Workers suffering from work-related musculoskeletal disorders (new or long-standing) in 2023/24

**168,000**

Workers suffering from a new case of a work-related musculoskeletal disorder in 2023/24

**7.8 million**

Working days lost due to work-related musculoskeletal disorders in 2023/24

## 2025

**0.5 million**

Workers suffering from work-related musculoskeletal disorders (new or long-standing) in 2024/25

*Source: Estimates based on self-reports from the Labour Force Survey for people who worked in the last 12 months*

**511,000**

Workers suffering from work-related musculoskeletal disorders (new or long-standing) in 2024/25

**173,000**

Workers suffering from a new case of a work-related musculoskeletal disorder in 2024/25

**7.1 million**

Working days lost due to work-related musculoskeletal disorders in 2024/25

# 2024

 **12,000**

Lung disease deaths each year estimated to be linked to past exposures at work

*Source: Counts from death certificates and estimates from epidemiological information*

**12,000**

Lung disease deaths each year estimated to be linked to past exposures at work

**2,257**

Mesothelioma deaths in 2022, with a similar number of lung cancer deaths linked to past exposures to asbestos

**20,000**

Estimated new cases of breathing or lung problems caused or made worse by work, averaged over the last three years according to self-reports from the Labour Force Survey

# 2025

 **11,000**

Lung disease deaths each year estimated to be linked to past exposures at work

*Source: Counts from death certificates and estimates from epidemiological information*

**11,000**

Lung disease deaths each year estimated to be linked to past exposures at work

**2,218**

Mesothelioma deaths in 2023, with a similar number of lung cancer deaths linked to past exposures to asbestos

**22,000**

Estimated new cases of breathing or lung problems caused or made worse by work, averaged over the last three years according to self-reports from the Labour Force Survey

Fatalities have decreased across the UK; this is also mirrored in the Construction Sector with a significant decrease.

3 reported sectors have decreased since the previous reporting period however, 3 have increased.

The bigger picture however is that 'non-fatal' injuries are up **76,000** !!!!!

## **Construction specific;**

124 fatalities – 35 construction (not including 4 members of the public)

## **35 construction fatalities;**

18 falls from height

6 Trapped by something collapsing or overturning

4 contact with electricity

4 struck by moving or flying object

1 contact with moving machinery

1 struck by moving vehicle

1 other kind of accident
